Voice Channels

While they may not be used 95% of the time, they can be useful for an occasional meeting point, and for emergency *need to vc with team x etc*

Community Notes

Keep VC Last - when many people are in a channel, it'll push the rest of the channels down, so it's important to put the VC at the end, otherwise you can't see the other channels, if you think many people will use the channels, I'll get a channel generator.

#dev-posts
